

# PROCESS FLOAT STEAM TRAP

## MODEL JL14-X/JLH14-X

### HIGH-CAPACITY IRON OR STEEL FLOAT STEAM TRAP WITH THERMOSTATIC AIR VENTING

#### Features

**Extremely durable, inline-repairable, compact float trap with thermostatic air venting for large process or heating equipment.**

1. Double-seated valve with heat-treat hardened valve seat and valve head provides continuous, smooth, low-velocity condensate discharge as process loads vary.
2. Self-aligning valve mechanism with stainless steel internals minimizes wear.
3. Integral thermostatic capsule (X-element) vents air automatically until near-to-steam temperature, for rapid start-up, increased production and even heating.
4. Easy, inline access to internal parts simplifies cleaning and reduces maintenance costs.
5. High-quality stainless steel internals and hardened valve surfaces ensure reliability.

#### Specifications

Model	JL14-X		JLH14-X		
	Screwed	Flanged*	Screwed	Socket Welded	Flanged
Connection					
Size (mm)	80				
Orifice No.	10, 16		10, 18, 32		
Maximum Operating Pressure (MPaG) PMO	1.0, 1.6		1.0, 1.8, 3.2		
Maximum Differential Pressure (MPa) ΔPMX	1.0, 1.6		1.0, 1.8, 3.2		
Minimum Operating Pressure (MPaG)	0.01				
Maximum Operating Temperature (°C) TMO	220		240 (400**)		

\* JL14-X has a screwed-in flange \*\* Optional JLH14-B with bimetal-type air vent unit for initial air venting 1 MPa = 10.197 kg/cm<sup>2</sup>  
 PRESSURE SHELL DESIGN CONDITIONS (**NOT** OPERATING CONDITIONS): Maximum Allowable Pressure (MPaG) PMA: 1.6 (JL14-X), 3.2 (JLH14-X)  
 Maximum Allowable Temperature (°C) TMA: 220 (JL14-X), 400 (JLH14-X)

To avoid abnormal operation, accidents or serious injury, DO NOT use this product outside of the specification range. Local regulations may restrict the use of this product to below the conditions quoted.

Discharge Capacity

————: Maximum capacity of JL14-X/JLH14-X.  
 - - - - -: Minimum amount of condensate required to prevent steam leakage.

1. Line numbers within the graph refer to orifice numbers.
2. Differential pressure is the difference between the inlet and outlet pressure of the trap.
3. Capacities are based on continuous discharge of condensate 6 °C below saturated steam temperature.
4. Recommended safety factor: 1.5.

**CAUTION**

DO NOT use this product under conditions that exceed maximum differential pressure, as condensate backup will occur!
