

# FREE FLOAT<sup>®</sup> STEAM TRAP

## MODEL JH8R-X/JH8R-B CAST STEEL

### FREE FLOAT STEAM TRAP WITH THERMOSTATIC AIR VENTING

#### Features

A reliable and durable cast steel\* steam trap for use on large-size process equipment. JH8R-B is also suitable for high-pressure process equipment.

1. Self-modulating free float provides continuous, smooth, low-velocity condensate discharge as process loads vary.
2. Constant water seal design ensures a steam-tight seal, even under low-load conditions.
3. **JH8R-X**: Thermostatic capsule (X-element) with “fail open” feature vents air automatically at close-to-steam temperature.
4. **JH8R-B**: Thermostatic bimetal air vent valve vents air automatically for rapid startup.
5. Built-in screen with large surface area ensures extended trouble-free operation.
6. Easy, inline access to internal parts simplifies cleaning and reduces maintenance costs.

\* Stainless Steel body available on request

#### Specifications

Model	JH8R-X		JH8R-B	
	Socket Welded	Flanged	Socket Welded	Flanged
Connection	Socket Welded	Flanged	Socket Welded	Flanged
Size	DN 50, 80, 100		DN 50, 80, 100	
Orifice No.	0.5, 2, 5, 10, 14, 22, 32		0.5, 2, 5, 10, 14, 22, 32, 40, 46	
Maximum Operating Pressure (barg) PMO	0.5, 2, 5, 10, 14, 22, 32		0.5, 2, 5, 10, 14, 22, 32, 40, 46	
Maximum Differential Pressure (bar) ΔPMX	0.5, 2, 5, 10, 14, 22, 32		0.5, 2, 5, 10, 14, 22, 32, 40, 46	
Maximum Operating Temperature (°C) TMO	240		400*/425	
Type of Air Vent	X-element (6 °C subcooling)		Bimetal (vents air up to approx. 100 °C)	

PRESSURE SHELL DESIGN CONDITIONS (NOT OPERATING CONDITIONS):

Maximum Allowable Pressure (barg) PMA: 40 (JH8R-X), 46 (JH8R-B)

Maximum Allowable Temperature (°C) TMA: 400\*/425

\* With PN flange

1 bar = 0.1 MPa

To avoid abnormal operation, accidents or serious injury, DO NOT use this product outside of the specification range. Local regulations may restrict the use of this product to below the conditions quoted.

100	580	570	596	622				125

Other standards available, but length and weight may vary  
\* Weight is for DIN PN 25/40

**Discharge Capacity**

● **JH8R-X**

● **JH8R-B**

1. Line numbers within the graph are orifice numbers.
2. Differential pressure is the difference between the inlet and outlet pressure of the trap.
3. Capacities are based on continuous discharge of condensate 6 °C below saturated steam temperature.
4. Recommended safety factor: at least 1.5.

DO NOT use traps under conditions that exceed maximum differential pressure, as condensate backup will occur!
