

AUTOMATIC AIR VENT

MODEL **VS3-P** Clean Air Vent
STAINLESS STEEL

SANITARY AUTOMATIC AIR VENT FOR LIQUID SYSTEMS

Features

Float-type mechanical valve recommended for venting air in purified water and other liquid systems such as in the pharmaceutical, biotechnology, and cosmetics industries.

1. Precision-ground float, three-point seating and valve seat with rubber contact ensure superior sealing.
2. Only one moving part, the free float, prevents concentrated wear and provides long service life.
3. Internal buff-polishing with an additional interior and exterior electro-polish option to 0.4 μm Ra for improved resistance to bacterial growth.
4. Maintainable design lowers cleaning costs.
5. Dual function as air vent and vacuum breaker.

Discharge Capacity

1. Differential pressure is the difference between the inlet and outlet pressure of the air vent.
2. Capacities are equivalent capacities of air at 20 °C under atmospheric pressure.

CAUTION Air vents used under conditions which exceed maximum differential pressure will fail closed.
