

TLV[®]

Pocket TrapMan[®]

PT3

- Surface Temperature / Sound / Vibration Measurement
- Automatic Judgment of Steam Traps and Valves
- Intrinsically Safe

NEW

All-In-One Tool for Daily Inspections, Wherever the Job Takes You

Automatically diagnose steam trap and valve operation,
inspect bearings and a range of equipment.

Tag and manage locations, record and share custom
inspection data in one simple workflow.

Certified for safe use in hazardous areas.

Bluetooth®
Connectivity

An all-in-one inspection tool for measuring surface temperature, sound, and vibration. Designed to support reliable daily inspections in a wide variety of industrial environments.

Intrinsically Safe

Surface Temperature Measurement

Accurately measures the surface temperature of equipment or piping using a contact sensor.

Measurement range : - 40 to 350°C

Audio Monitoring

Provides real-time audio monitoring of operating sounds via Bluetooth earphones.

*Audio is not recorded or stored.

Vibration Measurement

Measures vibration at bearings of rotating machinery, results displayed in decibels (dB).

Measures by shock pulse (32 kHz)

Asset Tagging

Easily tag assets and scan RFID tags or QR codes* to streamline inspection routes and maintain consistency.

* With the dedicated CMRecorder app.

View Detailed Specifications

Applications

Surface temperature, vibration, and ultrasound data enable inspection of a wide range of plant equipment.

Valve Leakage Condition Assessment

Diagnoses internal leakage in valves installed on steam and air lines.

Judgment results

Good / Caution / Leaking

Steam Trap Condition Assessment

Automatically judges the operating status of steam traps.

Judgment results

Good / Caution / Leaking / Blocked / Abnormally Low Temperature / High Temperature Failure / Low Temperature Failure

Rotating Equipment Condition Monitoring

Measures vibration of rotating equipment such as pumps and enables early detection of abnormal conditions.

Displayed values

Peak value / Average value / Crest Factor (CF)

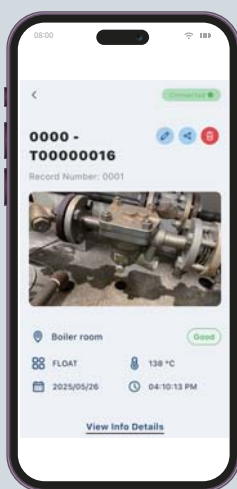

Note: Results vary by trap type and manufacturer.

Smart Data Management for Daily Inspections

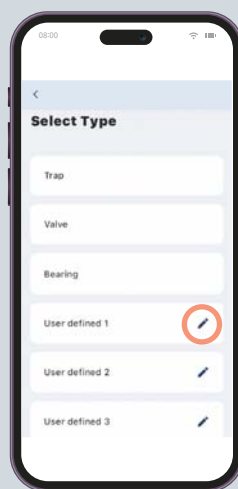

CMRecorder™
Condition Monitoring Recorder

Manage and share inspection data seamlessly with the CMRecorder app. PT3 wirelessly transfers inspection data to CMRecorder, where it is securely stored and easily converted into clear, professional reports for informed maintenance decisions.

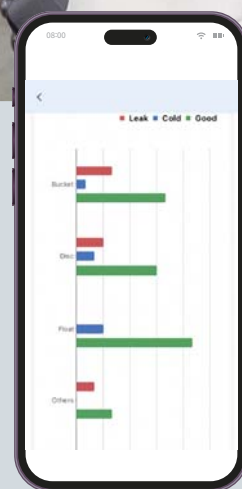

Capture every detail that matters

Go beyond raw measurement data. Store field photos, operating conditions, pressure, location, and comments with each inspection record.

Custom fields to match your site

User Defined fields give you the flexibility to define up to 3 custom inspection targets to match your site's equipment layout and inspection routes.

From raw data to actionable reports

Inspection results are automatically aggregated into clear reports and exported in CSV or PDF format for easy sharing, management, and analysis.

Pocket TrapMan®

MODEL PT3

POCKET-SIZE DIAGNOSTIC INSTRUMENT FOR BASIC OPERATIONAL JUDGEMENTS

Features

Compact diagnostic instrument employing ultrasonic and temperature detection for steam trap, valve and bearing inspection.

1. Compact and easy to use for daily maintenance.
2. Simultaneously measures vibration and surface temperature.
3. Large reflective LCD with frontlight for clear display in any conditions.
4. Quickly makes basic judgements for steam traps and valves to help identify where repairs or replacements may be necessary.
5. dB is displayed for bearing inspection to help diagnose operational status of rotating equipment.
6. Certified intrinsically safe: can be used in hazardous areas.
7. Use together with CMRecorder (Condition Monitoring Recorder) for iOS/Android for location tagging, inspection data management and reporting.
8. Up to 3 days of use on a single charge. (8 hours per day with frontlight off.)
9. Asset location data can be registered by reading RFID tags with PT3 or QR codes with the CMRecorder app.

Specifications (Diagnosis Instrument)

Inspection Type	Steam Trap Diagnosis	Valve Diagnosis	Bearing Inspection/ User defined 1, 2, 3 ¹⁾	Audio Monitoring
Mode	Trap	Valve	Bearing	—
Description	Intrinsically Safe: Certified to meet all of the following standards ATEX: CE II3G Ex ic IIB T3 Gc IECEX: Ex ic IIB T3 Gc UL: Class I, Zone 2, AEx ic IIB T3 Gc cUL: Ex ic IIB T3 Gc NEPSI: Ex ic IIB T3 Gc			
Measured Variables	Ultrasonic sound, surface temperature		Vibration acceleration (shock pulse/32 kHz), surface temperature	Vibration acceleration (shock pulse/32 kHz), surface temperature, sound
Information Displayed	<ul style="list-style-type: none"> • Operation judgements: Good, Caution, Leak (Leak-L, Leak-S²⁾), Blocked, Low Temp³⁾, Temperature Adjustment Failure (FAIL ADJ-H, FAIL ADJ-L)⁴⁾ • Surface temperature 	<ul style="list-style-type: none"> • Valve seal judgements: Good/Caution/Leak • Surface temperature 	<ul style="list-style-type: none"> • Average vibration acceleration level (AVG) • Peak vibration acceleration level (PEAK) • CF Value⁵⁾ • Surface temperature 	<ul style="list-style-type: none"> • Average vibration acceleration level (AVG) • Surface temperature
Measurement Time	15 seconds	10 seconds	Up to 1 minute	Optional
	<ul style="list-style-type: none"> • Measurement begins and ends automatically • Measurement status is displayed by the LED indicator and in the display 		<ul style="list-style-type: none"> • Measurement begins automatically • Measurement ends after 1 minute or when the probe is removed; data is stored automatically • Measurement status is displayed by the LED indicator after 10 seconds or when the measured value stabilizes 	<ul style="list-style-type: none"> • Measurement begins automatically
Data Memory	3,000 measurement results per inspection type (4 digit Control ID)			— ⁶⁾

¹⁾ The diagnosis name can be set via the CMRecorder.

²⁾ [Leak-L, Leak-S] judgement is only for TLV Steam Traps.

³⁾ There is no [Low Temp] judgement for Temperature Control (Adjustable) Steam Traps.

⁴⁾ [Temperature Adjustment Failure] is only for Temperature Control (Adjustable) Steam Traps.

⁵⁾ Crest Factor Value = PEAK – AVG

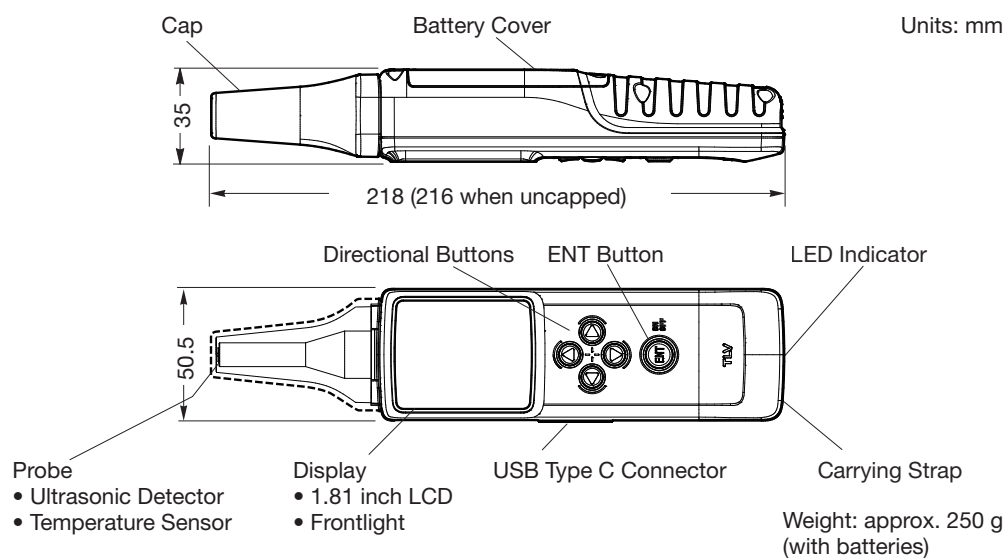

⁶⁾ Real-time audio monitoring is available via wireless earphones. (Recording is not possible.)

Specifications (Diagnosis Instrument)

Temp. Measurement	Measurement Range: -40 to 350 °C
Operating Ambient Temperature Range	-10 to 50 °C (0 to 40 °C when charging)
Probe Durability	400,000 cycles
Display	1.81 inch reflective MIP LCD with frontlight
Units	Selectable: MPa & °C, bar & °C, kg/cm ² & °C, or psi & °F
Language	English, Chinese (simplified), French, German, Japanese, Spanish
Power	Lithium-ion secondary battery 3.7 V 1000 mAh Battery Life: Up to 3 days of continuous use on a single charge (8 hours of use per day without frontlight) Charging method: USB adapter 5V (USB Type C)
Total Battery Use Time	Approximately 24 hours without frontlight
Protection Class	IP54 (protected against limited dust ingress and against water spray from any direction)
Bluetooth®	Ver 5.0 Class 1
RFID	LF (125 kHz)
Wireless Standards	CE (Europe), FCC (USA), IC (Canada), IMDA (Singapore), MIC (Japan), RCM (Australia), R-NZ (New Zealand), SRRC (China)
Other Standards	Lithium-ion secondary battery: UN38.3 IEC62133-2:2017 Drop test: JISC60068-2-31:2013 Height: 100 cm; Material: concrete Environment: REACH/RoHS2 conformity

Hardware:	Main body with probe
Accessories:	Hex key for battery cover and probe protection cover
Manual:	Instruction Manual (Safety and Explosion-proof Requirements) Instruction Manual (Operation) (PDF file can be downloaded from website)

CMRecorder

Software:	App available free of charge from the App Store, Google Play and other approved sources. App Store is a service mark of Apple Inc., registered in the U.S. and other countries and regions. Google Play and the Google Play logo are trademarks of Google LLC.
-----------	--

1. Read the instruction manual carefully before use and be sure to follow the instructions.
2. Be sure to charge the battery pack regularly. If the device is not used for a long time with the battery pack installed, fully charge the battery pack once a month. The battery will deteriorate and become unusable.
