

CYCLE COUNTER

MODEL C1CM/C1CF C1SM/C1SF

COUNTER FOR MONITORING THE NUMBER OF PUMP CYCLES OF POWERTRAPS

Benefits

Enables monitoring of the number of pumping cycles of GP series PowerTraps to help determine the timing of maintenance, or estimate the volume of pumped condensate.

1. Two different types are available to support various system requirements.
2. The Counter Unit types C1CM(-EX) / C1CF(-EX) include a built-in LCD display and LED that flashes with each operation cycle to allow easy direct observation.
3. The Terminal Box Types C1SM(-EX) / C1SF(-EX) combine with an external display to enable remote observation or integration into a broader monitoring system.
4. Can be equipped on currently installed GP series PowerTraps.
5. OK for installation outdoors.

Connections and sizes in bold are standard

²⁾ PMO/TMO and PMA/TMA apply to the inserted portion only. Ambient Pressure/Temperature apply to the external portion.

³⁾ Do not use for toxic, flammable or otherwise hazardous fluids. ⁴⁾ Battery cannot be replaced. ⁵⁾ Counter display can be reset to zero by using the included resetter.

To avoid abnormal operation, accidents or serious injury, DO NOT use this product outside of the specification range. Local regulations may restrict the use of this product to below the conditions quoted.

Safety Barrier: The intrinsic safety specifications of the terminal box type C1SM-EX/C1SF-EX require a safety barrier to be used.

CAUTION DO NOT DISASSEMBLE OR REMOVE THIS PRODUCT WHILE THE POWERTRAP IS UNDER PRESSURE. Allow internal pressure of the PowerTrap to equal atmospheric pressure and its surface to cool to room temperature before disassembling or removing. Failure to do so could cause burns or other injury. READ INSTRUCTION MANUAL CAREFULLY.
