

FREE FLOAT[®] STEAM TRAP

MODEL SH6NL/SH6NH

HIGH-PRESSURE FREE FLOAT STEAM TRAP WITH THREE-POINT SEATING AND THERMOSTATIC AIR VENTING

Benefits

Inline repairable trap with tight shut-off for drainage of superheated or high-pressure steam mains, equipment, and turbines.

1. Self-modulating free float provides continuous, smooth, low-velocity condensate discharge.
2. Constant water seal and unique rotational seating design prevents concentrated wear to ensure long life.
3. Three-point seating ensures steam-tight seal, even under no-load conditions.
4. Easy, inline access to internal parts to simplify cleaning and lower maintenance costs.
5. Rugged float construction with up to 1600 or 2300 psig* hydraulic shock rating ensures excellent resistance to water hammer.
6. Durable thermostatic air vent for exceptionally fast start-up.
7. Built-in screen for extended trouble-free service.

* Depending on orifice no.

Specifications

Model	SH6NL		SH6NH
Connection	Socket Weld	Flanged	Socket Weld
Size (in)	1	1	3/4, 1
Orifice No.	46, 65		100
Maximum Operating Pressure (psig) PMO	650, 925		1500
Maximum Differential Pressure (psi) ΔPMX	650, 925		1500
Minimum Operating Pressure (psig)	1.5		1.5
Maximum Operating Temperature (°F) TMO	800		800
Maximum Allowable Pressure (psig) PMA	925		1500
Maximum Allowable Temperature (°F) TMA	800		800

CAUTION To avoid abnormal operation, accidents or serious injury, DO NOT use this product outside of the specification range. Local regulations may restrict the use of this product to below the conditions quoted.

Connections and sizes in bold are standard

Discharge Capacity

- 1. Line numbers within the graph refer to orifice numbers.
- 2. Differential pressure is the difference between the inlet and outlet pressure of the trap.
- 3. Capacities are based on continuous discharge of condensate 11 °F below saturated steam temperature.
- 4. Recommended safety factor: at least 1.5.

CAUTION DO NOT use this product under conditions that exceed maximum differential pressure, as condensate backup will occur!

CAUTION DO NOT DISASSEMBLE OR REMOVE THIS PRODUCT WHILE IT IS UNDER PRESSURE. Allow internal pressure of this product to equal atmospheric pressure and its surface to cool to room temperature before disassembling or removing. Failure to do so could cause burns or other injury. READ INSTRUCTION MANUAL CAREFULLY.
