

STEAM PRESSURE REDUCING VALVE

MODEL COSR-3/COSR-16

SELF-ACTUATED PRESSURE REDUCING VALVE WITH SHOCK-ABSORBING PISTON

Features

Technologically advanced pressure reducing valve for accurate control in process steam systems.

1. Self-aligning shock-absorbing spherical piston and advanced pilot regulator designs maintain secondary steam pressure accuracy, even during adverse process conditions.
2. Major internal components made of stainless steel for long service life.
3. Large surface area integral screen for pilot valve extends trouble-free service.
4. Internal secondary pressure-sensing channel makes external sensing line unnecessary.
5. COSR-16, sizes 65 mm and larger have a silencer for noise reduction.

Option

Pressure Gauge Unit	Replaces the standard screen holder plug to enable installation of a pressure gauge of the user's choice. Primary side: M16 holder plug (male/female), BSP/Rc(PT)/NPT $\frac{3}{8}$. An elbow is required for pressure gauge installation. Secondary side: Rc(PT) $\frac{3}{8}$ mounting port for elbow and pressure gauge installation. Elbows, pressure gauge and connecting parts must be purchased separately.
