

FREE FLOAT[®] AIR TRAP

MODEL JA3D

FREE FLOAT AIR TRAP WITH TIGHT SHUT-OFF FOR AIR SERVICE

Features

Light free-float air trap to automatically drain condensate and oil from compressed air systems.

1. Self-modulating free float provides soft, continuous, and smooth, low velocity discharge as process loads vary.
2. Perfect air-tight seal, even under low-load conditions.
3. Only one moving part, the free float, prevents concentrated wear and provides long maintenance-free service life.
4. Built-in screen with large surface area ensures extended trouble-free service.
5. Manual blow down device allows cleaning of the valve seat from outside during operation in case of oil and dirt accumulation.
6. All internal parts made of stainless steel.
7. For either horizontal or vertical installation.

NOTE
A pressure-balancing line must be connected to the air system from the balancing port at the top or side of the trap to a place above any possible condensate accumulation in the system.

Discharge Capacity

1. Differential pressure is the difference between the inlet and outlet pressure of the trap.
2. The chart is applicable to condensate below 100 °C
3. The discharge capacity is for a liquid with specific gravity of 1.
4. Recommended safety factor: at least 1.5.

CAUTION DO NOT use this product under conditions that exceed maximum differential pressure, as condensate backup will occur!
