

CYCLONE SEPARATOR

MODEL DC7 STAINLESS STEEL

HIGH EFFICIENCY STAINLESS STEEL SEPARATOR

Features

All stainless steel separator, employing a cyclone-effect to efficiently separate condensate from steam and air.

- 1. All-welded, maintenance-free construction.
- 2. Compact and light weight.
- 3. All parts made from stainless steel with high durability and corrosion resistance for long service life.
- 4. Separator achieves condensate separation efficiency as high as 98%.

SPECIFICATIONS

| Model | | DC7 | | | | |
|------------------------------------|-----|---|---------------|---------|--|--|
| Connection | | Screwed | Socket Welded | Flanged | | |
| Size | | ½",¾",1," 1½", 2" DN 15, 20, 25, 40, 50 | | | | |
| Maximum Operating Pressure (barg) | PMO | 25 | | | | |
| Maximum Operating Temperature (°C) | TMO | 300 | | | | |
| Applicable Fluids* | | Steam, Air | | | | |

* Do not use for toxic, flammable or otherwise hazardous gases.
PRESSURE SHELL DESIGN CONDITIONS (**NOT** OPERATING CONDITIONS):
Maximum Allowable Pressure (barg) PMA: 25
Maximum Allowable Temperature (°C) TMA: 300

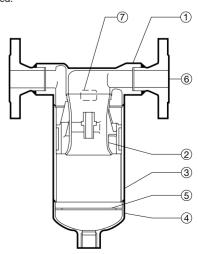

1 bar = 0.1 MPa

To avoid abnormal operation, accidents or serious injury, DO NOT use this product outside of the specification range. Local regulations may restrict the use of this product to below the conditions quoted.

| No. | Description | Material | DIN* | ASTM/AISI* |
|-----|------------------|---|-------------------|-------------|
| 1 | Body | Cast Stainless Steel A351 Gr.CF8 | 1.4312 | _ |
| 2 | Separator | Cast Stainless Steel SCS13 | 1.4308 | A351 Gr.CF8 |
| 3 | Separator Body | Stainless Steel SUS304 | 1.4301 | AISI304 |
| 4 | Separator Bottom | Cast Stainless Steel A351 Gr.CF8 | 1.4312 | _ |
| (5) | Baffle | Stainless Steel SUS304 | 1.4301 | AISI304 |
| 6 | Flange** | Stainless Steel SUS304/ Cast Stainless Steel A351 Gr.CF8 | 1.4301/ 1.4312 | AISI304/ |
| 7 | Nameplate | Stainless Steel SUS304 | 1.4301 | AISI304 |

Consulting & Engineering Service

Dimensions

Flow Rate (Steam)

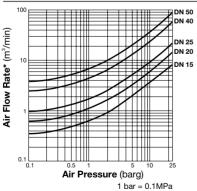

The chart to the left is used to determine the steam flow rate through the DC7 separator. It is based on a steam velocity in the piping of 30 m/sec. For other velocities, calculate the flow rate as follows:

Flow rate at v m/sec

Flow rate = (at 30 m/sec) $\times \frac{\sqrt{30}}{30}$

It is recommended that velocities not exceed 30 m/sec.

Flow Rate (Air)

The chart to the left is used to determine the air flow rate through the DC7 separator. It is based on an air velocity in the piping of 30 m/sec. For other velocities, calculate the flow rate as follows:

Flow rate at v m/sec

Flow rate $(at 30 \text{ m/sec}) \times \frac{\text{V}}{30}$

* For air at 20 °C under atmospheric pressure

Other standards available, but length and weight may vary

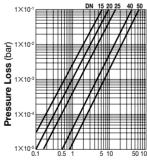

Pressure Loss (Steam)

The pressure loss chart is based on a steam pressure of 10 barg. For other pressures, multiply the steam flow rate by the correction factor given in the table below. Use this value on the pressure loss chart.

| Pressure (barg) | 1 | 3 | 5 | 7 | 10 | 16 | 20 | 25 |
|-----------------------------|------|------|------|------|----|------|------|------|
| Flow Rate Correction Factor | 2.24 | 1.62 | 1.34 | 1.16 | 1 | 0.81 | 0.73 | 0.67 |

Pressure Loss (Air)

The pressure loss chart is based on an air pressure of 10 barg. For other pressures, multiply the air flow rate by the correction factor given in the table below. Use this value on the pressure loss chart.

Air Flow Rate* (m3/min)

| Pressure (barg) | 1 | 3 | 5 | 7 | 10 | 16 | 20 | 25 |
|-----------------------------|-----|------|------|------|----|------|------|------|
| Flow Rate Correction Factor | 5.5 | 2.75 | 1.83 | 1.38 | 1 | 0.65 | 0.52 | 0.44 |
